## DeFi for Everyone: fija Capital and Black Manta Capital Partners Offer Investors Access to DeFi Yields through a Fully Automated Strategy Token, Packaged as a Regulated Security

MUNICH, 12 June 2024 – **fija Capital, in collaboration with Black Manta Capital Partners, proudly announces the launch of the fija USDC GMX Strategy Token. This innovative financial product provides retail investors from Germany and professional investors from Europe with an easy, transparent, and compliant way to earn yields in the decentralized finance (DeFi) space - fully automated.**

The fija USDC GMX Strategy Token is designed to streamline access to complex DeFi protocols, making it easier for everyone to participate. By leveraging a fully automated strategy, this token allows investors to benefit from the returns of the DeFi space while minimizing the complexities typically associated with such investments.

The token offering aims to deliver returns by employing advanced strategies to maximize yield, with potential annual returns exceeding 15%. The fija USDC GMX Strategy provides investors with substantial earning opportunities by supplying USDC liquidity on GMX, a leading DeFi platform. The strategy earns investors their cryptos through trading and borrowing fees while strategically hedging against price fluctuations on Aave with a short position.

The entire process is fully automated, seamlessly managing all transactions and ensuring that investors do not need to manually interact with multiple DeFi platforms. The strategy also includes automated rebalancing and risk management triggers to optimize performance and reduce risks.

Furthermore, the token adheres to strict regulatory standards, being issued as a regulated security, structured as bearer bonds and operating on the Arbitrum blockchain, ensuring both security and efficiency.

Investors in the fija USDC GMX Strategy Token can enjoy the power of top DeFi protocols with ease and confidence. Importantly, investors retain full control over their assets, as investments can be withdrawn at any time, offering both flexibility and peace of mind.

[Alexander Rapatz](#), Founding and Managing Partner at Black Manta Capital Partners, stated, *"We are excited to collaborate with fija Capital to democratize access to DeFi. Our goal is to break down the barriers to entry and provide a secure, transparent, and compliant investment product that delivers interesting returns for investors."*

[Christoph Scholze](#), Managing Director of fija Capital, added, *"The fija USDC GMX Strategy Token represents a significant advancement in making DeFi accessible to any crypto holders who want to earn interest on their crypto. By automating complex strategies and maintaining high compliance standards, we are offering a product that is both user-friendly and financially rewarding."*

#### Glossary:

- DeFi (Decentralized Finance): A financial system based on blockchain technology that provides financial services without traditional intermediaries like banks.
- USDC: A stable cryptocurrency pegged to the US dollar, maintaining a value of 1 USDC = 1 USD.
- GMX: A leading platform in the decentralized finance space that enables liquidity provision and trading on a blockchain. GMX offers an interface for trading and allows investors to earn additional returns through trading fees and lending / borrowing.
- Aave: An open-source and non-custodial protocol on the Ethereum blockchain that allows users to earn interest on deposits and borrow assets.
- Arbitrum: A layer-2 scaling solution for Ethereum that facilitates faster and more cost-effective transactions.
- Ethereum: A decentralized platform / blockchain that executes smart contracts and serves as the foundation for many DeFi protocols.
- Trading and Borrowing Fees: Fees incurred for trading and borrowing on DeFi platforms, which serve as a source of income for liquidity providers.
